ThermoFisher SCIENTIFIC

The world leader in serving science

Watson Gateway for Chromeleon
Version 1.2

Certificate of Software Validation

This version of Watson Gateway for Chromeleon software has been designed, tested, validated, and distributed according to Thermo Fisher Scientific Software Development Cycle guidelines modeled after ISO 9001:2015 standards. Structural and functional testing has also been done in accordance with these guidelines. The software has met all functional specifications and release requirements. For public release, the protocol for changing Thermo Fisher Scientific software products includes documentation of the release and the archiving of source code in a secure location.

Release Notes for this version are provided with the software.

If required for detailed review by authorized governmental or regulatory representatives, Thermo Fisher Scientific provides confidential access to source code at Thermo Fisher Scientific development facilities along with access to documents and reports related to Thermo Fisher Scientific software products. A standard non-disclosure agreement may be required. All documents shall always remain in the possession of Thermo Fisher Scientific Corporation.
