Dear Valued Customer,

This letter contains important product lifecycle information about your Thermo Scientific™ Dionex™ Integral™ Process Analytical System. Please keep this letter for future reference.

Thank you for your continued patronage of Thermo Fisher Scientific products and services. Because you are a valued customer, we would like to keep you updated with information that may affect you.

Due to supply chain challenges and low availability of certain parts and critical components, Thermo Fisher Scientific has decided to **discontinue the Dionex Integral Process Analytical Systems**. The affected modules are listed in Table 1, below.

Orders for the modules listed in Table 1 will be accepted until July 31, 2023. Special orders in place and active prior to the announcement date will be honored according to the terms of that order, with regard to product availability, warranty, or support terms. After the last shipment and in accordance with our Life Cycle Policy, Thermo Fisher Scientific will provide at least 7 years of full product support, including parts and repair service.

We realize the inconvenience these product discontinuances may cause you when planning future investments. We continue to improve our **Thermo Scientific™ Dionex™ IC and HPIC Systems** to meet the current and future needs of your laboratory and encourage you to contact your local Sales Representative for any questions or guidance. We will endeavor to do all we can to make this transition as smooth as possible.

Yours sincerely,

David G. Moore
 Sr. Product Manager, Ion Chromatography and Sample Preparation
