Question/Issue/Symptom/Problem:
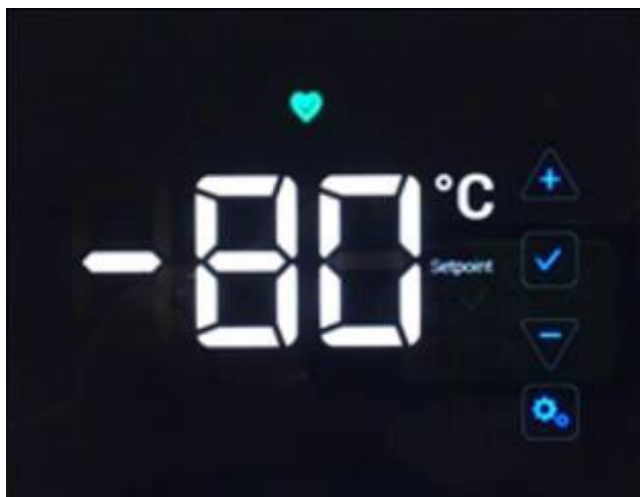

How to Adjust Standard Performance (STP) Freezer Control Set point.

Resolution/Answer:

Follow Steps below:

1. Press either the up or down arrow button.

2. The display will then show current setpoint.

3. Adjust by pressing + or – arrow buttons to desired temperature setpoint.

4. Select the checkmark button to save control setpoint. Setpoint range for -86c freezer = -50c to -86c & -10 to -40 for -40 Freezers.

Note: If set point security is active. Enter the 3-digit security code to access the control setpoint. If you forget the setpoint security code, contact customer support.

If wanting to adjust security code once in the setting screen, follow steps below.

- Press the settings button (Gear Icon) 4 times.
- The setpoint security code consists of 3 digits, each of which must be set in sequence from left to right.
- Use the plus or minus button to adjust each value, and the checkmark button to save each value of the 3- digit security code.
