Re: Cardinal Health CHG Pro Series Refrigerators

Dear Valued Customers and Channel Partners,

We are always working to ensure that our cold storage offerings are aligned with our customers' needs and provide the best possible value. As of April 4th, 2024 we will be discontinuing our Cardinal Health CHG Pro Series Undercounter Refrigerators and we will no longer be accepting new orders for these models. Cardinal Health Pro Series Undercounter Refrigerators will be replaced by a new series of CHG Laboratory Pro Series Undercounter Refrigerators; additional information regarding the new series will be available in the coming months.

Please see Appendix A for a full list of models affected by this discontinuation, as well as suggested replacement models for customers with immediate need who cannot wait for the new Series to be launched.

Thermo Fisher Scientific is committed to serving our customers with high-quality, technically advanced products, and we will continue to develop innovative cold storage products for the life science research community. We look forward to supporting your cold storage needs and continuing to enable our customers to make the world healthier, cleaner, and safer.

Kind regards,

John Jalette
