

# Standard Two-Year Warranty for GENESYS Spectrophotometers

The precise terms concerning the start date and details of service under the warranty on your Thermo Scientific™ GENESYS™ series spectrophotometers are detailed in the accompanying product warranty statement.

Unless otherwise stated, the term "GENESYS spectrophotometer" refers to the following models only:

GENESYS 30	GENESYS 140	BioMate 160
GENESYS 40	GENESYS 150	
GENESYS 50	GENESYS 180	

## Limitation of Warranty on the Tungsten-Halogen Lamp in GENESYS 30, GENESYS 40 and GENESYS 140 models

The spectrophotometer lamp is a consumable with an expected lifetime of over 1000 hours. Lamp replacement is not covered under warranty other than within the first thirty (30) days after receipt of the instrument. In the event that a customer requests warranty service and the only fault found is a failed or worn-out lamp, the customer will be charged the full cost of the replacement lamp plus the minimum labor and travel charges (field service), or return shipping charge (depot service), in effect at the time. To avoid receiving an unexpected bill for service, you are strongly encouraged to consult with our qualified UV-Vis technical support team to ensure that any loss of performance or function is not caused by a worn out lamp before requesting service for your GENESYS 30, GENESYS 40, and GENESYS 140 models.

## Specific Three-Year Warranty on the Xenon Lamp in GENESYS 50, GENESYS 150, GENESYS 180, and BioMate 160 Models

Xenon lamps are warranted against failure for a period of three (3) years.

The standard warranty period for the GENESYS spectrophotometers is TWO (2) years, with the start date being determined as described in the accompanying product warranty statement.

Thermo Fisher Scientific reserves the right to request the return of failed components that are being replaced under warranty.

Register your spectrophotometer Online (see next page) and retain proof of the delivery date.

## Extend Your Warranty to Three Years by Registering Your Instrument

If you register your GENESYS spectrophotometers at our website:

<http://www.thermofisher.com/warranty> within 6 months of the date of manufacture, we will extend the period of your instrument's warranty to THREE (3) years subject to the same terms and conditions as the standard warranty.

We strongly encourage all customers to register their spectrophotometers with us. Registering your product means:

1. You receive an additional 12 months of warranty coverage for your instrument.
2. We will notify you by email should new versions of on-board software become available.  
Downloading and installing software updates is easy and fast.
3. Should you need to contact our support group for technical support or repair, you will be able to speak to a technical representative more quickly.
4. Should we develop new accessories for your product, we will notify you of the new accessories and their capabilities.
5. We will be able to communicate changes to your product's life-cycle status to you so that you can plan and budget for your future needs with adequate lead time.
